DETAILED ACTION

1. This communication is in response to Applicant's Amendment to Office Action dated March 19, 2009, filed April 27, 2009, and telephone interview conducted June 22, 2009.

1-1. Claim 9 has been amended. Claim 38 has been added and then canceled. Claims 1, 2, 4, 9-11, 17, and 27-37 are pending.

1-2. Claims 1, 2, 4, 9-11, 17, and 27-37 have been examined and allowed.

EXAMINER'S AMENDMENT

2. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this Examiner's amendment was given in a telephone interview with Mr. Artern N. Sokolov (Reg. No.: 61,325) on June 22, 2009.

4. The claims have been amended as follows:

4-1. Replace claim 9 as follows:

9. (currently amended): A user's request reflecting design system for timely and accurately reflecting users' requests on a product, comprising:

design data publicizing means for publicizing design data to users through a computer network;

correction data receiving means for receiving and storing correction data as said design data corrected by a user through said computer network; and

design assisting means for reflecting said correction data received by said correction data receiving means on product design,

wherein said design data publicizing means includes

public design data prepared in advance to be publicized among said design data,

an editing program file for editing said public design data, and

a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing

program file to said terminal or transferring a questionnaire entry page in the form of a menu provided in a design data public home page to said terminal, and

wherein the terminal includes

an information entry selecting means to selectively enter correction data either in the questionnaire entry page without downloading said public design data or by requesting transfer of said public design data from the design data publicizing processing unit to the user together with said editing program file,

Deleted: design information

Deleted: , wherein design information entered by the user is correction data

4-2. Cancel claim 38.

Reasons for Allowance

5. The following is an Examiner's statement of reasons for allowance:

5-1. The closest prior art of record discloses:

(1) A method for generating customized articles on a computer-based display (Berger et al., U.S. Patent 6,414,693 B1).

(2) A system for consumers to participate in polls and surveys (Goldstein, U.S. Patent Application Publication 2001/0032115 A1).

(3) An interactive web-based survey method (Peroff et al., WO 01/33831 A2).

5-2. Claims 1, 2, 4, 9-11, 17, and 27-37 are allowed in view of the claim amendments and Applicants' arguments at pages 11-14 of the Amendment filed February 18, 2009.

Techniques for customizing articles through Internet and interactive web-based survey are uncovered in the prior art. However, independent claims 1, 11, and 17 have identified the distinct combination of features including "receiving an electronic submission associated with a specific user to which said correction data and additional personal information of the specific user is attached" and "classifying said attached correction data based on the additional personal information of the specific user recited in said received electronic submission and registering said correction data in said data base based on the classification results" as shown in Fig. 1 and described in page 14, paragraph 2, without data mining, which has not been uncovered in a single teaching, nor would a modification of prior art references be obvious to one of ordinary skill in the art to yield these limitations in the context of the claim.

Independent claim 9 has identified the distinct combination of features including "a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal or transferring a questionnaire entry page in the form of a menu provided in a design data public home page to said terminal" and "the terminal includes an information entry

Art Unit: 2128

selecting means to selectively enter correction data either in the questionnaire entry page without downloading said public design data or by requesting transfer of said public design data from the design data publicizing processing unit to the user together with said editing program file” as described in page 20, paragraph 2, which has not been uncovered in a single teaching, nor would a modification of prior art references be obvious to one of ordinary skill in the art to yield these limitations in the context of the claim.

Moreover, as stated in MPEP § 2131.02, “The identical invention must be shown in as complete detail as is contained in the ... claim.” *Richardson v. Suzuki Motor Co.*, 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an *ipsissimis verbis* test, i.e., identity of terminology is not required. In *re Bond*, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990). Therefore, independent claims 1, 9, 11, and 17 have been allowed over the prior art of record.

Dependent claims are allowed as they depend upon allowable independent claims.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
